

Business Plans Made Easy

Description

Whether you are a start up business or you have a new idea for your existing business, it is always a good idea to produce a business plan, particularly if you are looking for funding. [Enloop](#) provides an easy to use online business plan building tool. There is a free version to get you started but you will soon upgrade to the paid version at \$19.95 per month. This is good value for the short time you may use the software and the time it will save you. The [Advanced Package](#) gives you a list of features including the ability to share the plan with up to 5 people. Ideal if you want to include your business partners, accountant or bank manager.

The TextSync is a clever feature that dynamically updates your financial figures in your textual content as demonstrated in the following video:
