

Online Booking Tool

Description

We were asked to look at an online booking system solution for our new client and recommended [Timely](#) for the Salon and Spa industry.

[Timely appointment scheduling system](#)

We chose Timely on the basis that it links with our preferred accounting system, Xero. It also has online payment integration with our chosen payment gateway, Square. For email marketing there is a link to your Mailchimp account, so it's all good stuff!

What sets Timely apart from other solutions is its ability to store customer notes and photographs. This is very useful for hair and beauty treatment repeat business and progress tracking. Effectively, it means you may not require an additional CRM solution.

If you do not need customer records, photos, documents and notes built into the same system, you might like to try [SimplyBook.me](#). This is a free service up to 50 bookings per month. It offers a nice selection of mobile friendly booking pages.
