

Agile Project Management

Description

Understanding Agile Project Management, Scrums and Sprints.

This 4 minute video introduces the stages Envision, Speculate, Explore, Adapt and Close.

Are you familiar with the following?:

- Working in Silos, excessive hands off and red tape
- Lack of communication, trust within teams and cross functionality
- Lack of generalising specialist
- Working on bad, missing or changing requirements
- Firefighting - being reactive to quality issues
- Unnecessary or heavy processes and documentation
- Large and small daily impediments
- Disengaged employees and customers

Then learn more about how Agile could help your business.

For a more in-depth look at Agile, the following video from Agile Training offers a journey through the Agile Lifecycle in just over an hour. Skip to the Leadership triangle (43 min) to see an overview of management responsibilities.
